MIKE **QUINN**

Gig Harbor, WA · (253) 858-5640
mquinnq@gmail.com · **LinkedIn Profile**

My experience is focused on software development and database management. I have developed applications utilizing C# (.Net 1.0 – 8.0), C++, Delphi (3.0 – 7.0), Azure, AWS, GCP, VOS, MS SQL, Postgres, Sybase, and SQL Anywhere. I have experience programming threaded solutions, business objects, architecting solutions, network sockets, and large-scale deployment scenarios. I have worked closely and effectively with end users, project management, and system staff.

Specialties: Architecting Solutions, Network Sockets, Deployment Automation, C#, Business Automation

EXPERIENCE

OCTOBER 2024 – PRESENT

SENIOR BACKEND ENGINEER, BROADPOINT GROUP

Collaborated in a four-person team to review and enhance backend APIs
Created a standardized microservice template aligned with SOLID principles
Built the User Details API with full PII compliance
Contributed to Engineering Design Document updates to support design clarity and downstream impact
Participated in Scrum ceremonies, including sprint planning, stand-ups, and retrospectives
Designed and deployed Azure Functions to handle critical business workflows with scalable, event-driven execution (both on-demand and timer-based)
Supported production deployments and troubleshooting across Azure resources, including API Management (APIM), Virtual Machines, configuration, Application Insights, and Redis

Key Technologies:
C#, .NET, Entity Framework Core, REST API, Azure (DevOps, B2C, Functions, APIM, VMs, Monitor), Redis, SQL Server, GraphQL

JANUARY 2022 – OCTOBER 2024

SENIOR FULL STACK ENGINEER, MAJORBOOST

Utilized Blazor to create a responsive UI for clients
Implemented Entity Framework for code-first database approach
Used various APIs and SDKs for client telephony communication: Twilio, Telnyx, Sinch
Built backend services to receive audio streams and perform real time transcriptions
Enabled backend communication including c# and Python applications with Kafka to provide generated AI responses to voice calls
Created suite of REST API endpoints for frontend functionality and client direct telephony integrations
Maintained CI/CD with infrastructure as scripts with Github and AWS integrations
Enabled caching with Redis including invalidation mechanisms
Worked within startup business with rapidly changing goals and milestones
Maintained a high bar for client experience and security including HIPPA requirements

Key technologies:

C#, .Net, Entity Framework Core, REST Api, Telephony APIs and SDKs (Twilio, Telnyx, Sinch), AWS (CloudWatch, ECS, X-Ray, Deployments, Polly, etc), Github, Google real time speech to text, Real time text to speech, gRpc, Streaming, Blazor, Python, Ubuntu, Node, Javascript, Grafana, OTel, Postgres

OCTOBER 2008 – JANUARY 2022

ENTERPRISE ARCHITECT, CIC PLUS, INC.

Rearchitected client flagship site
Developed new electronic form based business lines for government, HR, and compliance workflows
Planned and implemented application stack switch from asp.net to MVC
Worked with an active team of 20 developers maintaining 5 distinct business lines
Led the effort to move the development group to an Agile lifecycle
Responsible for the application security and framework
Adopted bootstrap for responsive views
Created Windows applications for customer service to tweak the many features within the client web sites
Developed WCF (self hosted and IIS hosted) solutions for messaging and partner integrations
Implemented SOAP and REST based API endpoints with multiple content types
Created OAuth 2.0 services for custom claim based authentication using x509 certificates
Created multiple Windows services to trigger tasks with time sensitive requirements
Responsible for planning and architecture with proof of concepts moving to Azure
Transitioned development group to Azure DevOps from VSTFS
Created and maintained Azure DevOps build pipelines, releases, and artifacts with CI/CD
Performed bi-monthly releases through automation for 70+ internal applications
Created a reverse proxy for http/s along with custom ports to manage API endpoints with support for version hiding, circuit breaking, and throttling
Championed WCAG 2.0 recommendations

MARCH 2003 – OCTOBER 2010

OWNER, PANURGY TECH

Developed multiple one-off applications for a diverse set of clients
Web applications for sales and marketing ventures
Windows applications for office and inventory management
Adaptation of dosing logic for horse performance and predictions for gambling purposes

MAY 1999 – OCTOBER 2007

SENIOR CLIENT SERVER ARCHITECT, LABOR READY, INC.

Development and maintenance of a suite of applications to coordinate remote sites (replacement for RemoteWare)
Responsible for research, technology choices, architecture, system design, base classes and migration to Microsoft .Net using c# for a team of 24 resources
Adopted Smart Client Solutions Factory (SCSF), Enterprise Library, WCF, and iDesign coding practices
Project Management Office, Software Development Life Cycle (SDLC), SOX, Requirement Gathering, Documentation, and ITIL experience
Instrumental in all aspects of contract resources
Provide internal mentoring and training along with coordinating external training opportunities

Code review responsibilities for legacy and new technology development
Development and maintenance of Payroll, A/R, Customer, Reporting, Employee, and User Account application solutions in Delphi
Employer payroll logic for State overtime and workers compensation
Managed new technology, change requests and bug fixes for a team of developers serving 2500+ users in 850+ offices throughout the US, Canada and the UK
Developed new components and threaded solutions
Developed software to communicate with 3rd party software (Diebold) for ATMs

JANUARY 1998 – APRIL 1999

SOFTWARE DEVELOPER, NEW ENGLAND SHIPPING SYSTEMS

Developed internal Management Information System for Maine and New Hampshire accounts using Sybase SQL Server and Delphi
Implemented internal network and e-mail system
Integrated shipping systems with AS/400 and PC based accounting/inventory systems using ODBC, DDE, keyboard mapping, and TCP/IP

JANUARY 1995 – JANUARY 1998

LEAD DEVELOPER, ATG TECHNOLOGIES

Developed telephony applications utilizing Microsoft SQL, VOX, ISDN, and Visual C++.
Managed R&D programmers and produced weekly status reports
Researched and implemented PC based phone system for customer service and telephony integration including priority queues, record capabilities, and ACD
Managed, organized, and maintained 28 T1 lines
Implemented internal network and e-mail system
Communicated with Marketing and worked with beta testers from product conception to completion

JANUARY 1993 – DECEMBER 1994

ADJUNCT INSTRUCTOR, SANTA FE COMMUNITY COLLEGE

Taught beginning students “Introduction to Computers” consisting of basic computer theory and hands on lab work
Taught advanced students “Pascal Programming” consisting of algorithms, database design, and memory management

JANUARY 1991 – DECEMBER 1994

ASSISTANT NETWORK ADMINISTRATOR, SANTA FE COMMUNITY COLLEGE

Designed, implemented and maintained 14,000 user campus e-mail system including 2 WAN sites using cc:Mail
Co-designed and implemented campus wide network comprised of 24 buildings
Managed support help desk for campus computer systems
Installed Internet connectivity for e-mail and TCP/IP stacks to the desktops
Developed utility programs for managing and streamlining network and e-mail functions.
Maintained HP Open View for network management
Installed and maintained concentrators and connectivity between buildings connected by CAT5 and fiber optic cabling

EDUCATION

JUNE 1992

ASSOCIATE IN COMPUTER ENGINEERING, SANTA FE COMMUNITY COLLEGE

Computer theory
Algorithms and logic

SKILLS

- ITIL
- Network Protocols
- C++
- Windows Servers and Clients
- Distributed Systems
- SQL
- Microsoft SQL sever
- PostgreSQL
- Interbase
- Sybase
- SDLCs
- Agile Development
- WPF
- ASP.Net
- MVC
- REST
- .Net Core
- Microservices
- C#
- OAuth
- Entity Framework
- SAML
- ASMX
- WCF
- WSE
- Patterns and Practices
- Enterprise Library
- Delphi
- Network Administration
- SOX+
